Project Work:

1) Title: Pizza Management System

Technologies Used: Java (Net beans 8.2), MySQL

Operating System: Windows 8

Project Description: It is an Ecommerce Web portal, it organizes shopping business operations like View Pizza, selling pizza, and shipping them etc. It has 2 interfaces, One is Admin interface, provides features like Adding / Editing / Deleting Customer, Product, User management and generating Reports. Another interface is User Interface, provides features like product menu, searching for products, buying products etc...

2) Title: Online Cake Shopping

Technologies Used: HTML5 (CSS, JavaScript, JQuery), MySQL, Sublime Text2

Operating System: Windows 8

Project Description: It is a system that allows users to check for various cakes available at the online store and purchase online. The project consists of list of Cakes and bakery products displayed in various categories. The user may browse through these items as per categories. If the user likes a product he may add it to his shopping cart. He may even pay through a credit card or cash on delivery. Once the user makes a successful transaction he gets a copy of the shopping receipt on his email id. User has also option for ordering custom cakes according to their requirements like cake's flavor, size, shape and so on. Thus the online Cake shopping project brings an entire cake shop online and makes it easy for both buyer and seller.
